

To The Members of the Regulatory and Appeals Committee

Although my vehicle is over 10 years of age, I still believe it to be in a very good condition.

I have continued to take very good care of this vehicle. I have never had any complaints regarding the condition of my car nor doing taxi, neither running my DCC contracts. I believe it to be in sound condition and I will continue to keep this car in the best condition possible.

In this ongoing crisis, in my opinion, is still not the best time to go for an upgrade due to the uncertainty of the times.

I would like my vehicle to be upgraded to a hybrid vehicle or even electric, as I consider this option the best for environment and taxi as well. The technology is still expensive, but improving fast and I think it is not the right time for such an investment. I wish to do that in the future, once we are back to the normal life. I honestly consider much wiser to wait until next year, when difficulties experienced by the taxi drivers trade will ease off.

I hope you understand my situation and accept my request to extend my taxi plate for another year. Anything that you think I should do to my vehicle, let me know and I will be happy to comply.

Many thanks,

George Lascu
