Equality Impact Assessment

Assessment Of: 2024/25 budget proposals		
\Box Policy \Box Strategy \boxtimes Function \Box Service \boxtimes New		
□ Other [please state] □ Already exists / review □ Changing		
Directorate: Corporate Services Assessment carried out by: Steve Wotton		
Service Area: Finance for all services Job Role: Finance Systems Manager		
Version/Date of sign off by Director: V1 13 February 2024		

Step 1: What do we want to do?

This assessment should be started at the beginning of the process by someone with a good knowledge of the proposal and service area, and sufficient influence over the proposal. It is good practice to take a team approach to completing the equality impact assessment. Please contact the Policy Officer early for advice.

1.1 What are the aims and objectives/purpose of this proposal?

Briefly explain the purpose of the proposal and why it is needed. Describe who it is aimed at and the intended aims / outcomes. Where known also summarise the key actions you plan to undertake. Please use <u>plain English</u>, avoiding jargon and acronyms. Equality Impact Assessments are viewed by a wide range of people including decision-makers and the wider public.

We, the Council are operating within our ten year Strategy taking us to 2030. This sets the tone for contributing to civic life and ensuring public services focus on 'place and person' while remaining accountable, fair and value for money. At the heart are the Teignbridge Ten overarching projects that guide our activities, where we focus our resources and how we shape services to deliver real progress for the district.

The budget proposal includes a council tax increase of £5.70 equivalent to 2.99% in 2023/24, a review of fees and charges, an assumed pay deal of a wage increase of 4.0% whilst continuing to maintain services.

The proposal is aimed at the Council.

1.2 Who will the proposal have the potential to affect?

Service users	☑ The wider community	🛛 Teignbridge workforce
---------------	-----------------------	-------------------------

1.3 Will the proposal have an equality impact?

Could the proposal affect access levels of representation or participation in a service, or does it have the potential to change e.g. quality of life: health, education, or standard of living etc.?

If 'No' explain why you are sure there will be no equality impact, then skip steps 2-4 and request review by your manager.

If 'Yes' complete the rest of this assessment.

Yes I No [please select]

Whilst a council tax increase is proposed Teignbridge has an approved council tax support scheme where it is possible to receive 100% reduction in the council tax charge.

Step 2: What information do we have?

2.1 What data or evidence is there which tells us who is, or could be affected?

Please use this section to demonstrate an understanding of who could be affected by the proposal. Include general population data where appropriate, and information about people who will be affected with particular reference to protected and other relevant characteristics (listed in 2.2).

Use one row for each evidence source and say which characteristic(s) it relates to. You can include a mix of qualitative and quantitative data - from national research, local data or previous consultations and engagement activities.

Outline whether there are any over or under representation of equality groups within your service - don't forget to benchmark to local population where appropriate.

For workforce / management of change proposals you will need to look at the diversity of the affected team(s) using available evidence such as the employee profile data. Identify any under/over-representation compared with Teignbridge's economically active citizens for age, disability, ethnicity, gender, religion/belief and sexual orientation.

Data / Evidence Source	Summary of what this tells us
[Include a reference where known]	
Census 2021 profile for Teignbridge – Office for	Details the demography of the Teignbridge
National Statistics	District in relation to:
	Population
2021 Census Profile for areas in England	• Age
and Wales - Nomis (nomisweb.co.uk)	Ethnicity
	Health
	Employment
	Education
Census 2021 interactive map of all measures	Provides further detail on demographic and
for Teignbridge – Office for National Statistics	other variables available from census 2021.
5 5	This breaksdown how each variable looks
<u> Age - Census Maps, ONS</u>	across Teignbridge.
Additional comments:	·

2.2 Do you currently monitor relevant activity by the following protected characteristics? Yes

🛛 Age	🛛 Disability	🛛 Gender Reassignment
🛛 Marriage and Civil Partnership	🛛 Pregnancy/Maternity	🛛 Race
🛛 Religion or Belief	\boxtimes Sex	\boxtimes Sexual Orientation

2.3 Are there any gaps in the evidence base?

Where there are gaps in the evidence, or you don't have enough information about some equality groups, include an equality action to find out in section 4.2 below. This doesn't mean that you can't complete the assessment without the information, but you need to follow up the action and if necessary, review the assessment later. If you are unable to fill in the gaps please state this clearly with a justification.

For workforce related proposals all relevant information on characteristics may need to be sought from HR (e.g. pregnancy/maternity). For smaller teams diversity data may be redacted. A high proportion of not known/not disclosed may require action to address and identify the information needed.

2.4 How have you involved communities and groups that could be affected?

You will nearly always need to involve and consult with internal and external stakeholders during your assessment. The extent of the engagement will depend on the nature of the proposal or change. This should usually include individuals and groups representing different relevant protected characteristics. Please include details of any completed engagement and consultation and how representative this has been of Teignbridge's diverse communities.

Include the main findings of any engagement and consultation in Section 2.1 above.

If you are managing a workforce change process or restructure please refer to HR for advice on how to consult and engage with employees. Relevant stakeholders for engagement about workforce changes may include e.g. staff-led groups, trades unions as well as affected staff.

Consultation is carried out with the Residents Panel, local businesses and the wider community via the Teignbridge District Council website. Discussion with Parish and Town Councils.

2.5 How will engagement with stakeholders continue?

Explain how you will continue to engage with stakeholders throughout the course of planning and delivery. Please describe where more engagement and consultation is required and set out how you intend to undertake it. Include any targeted work to seek the views of under-represented groups. If you do not intend to undertake it, please set out your justification. You can ask the Consultation Officer for help in targeting particular groups.

Public access to Council meeting.

Annual budget proposals survey/consultation

Future spending plans linked to the original annual budget will regularly be brought to Executive together with proposed variations and updates.

Step 3: Who might the proposal impact?

Analysis of impacts must be rigorous. Please demonstrate your analysis of any impacts of the proposal in this section, referring to evidence you have gathered above and the characteristics protected by the Equality Act 2010. Also include details of existing issues for particular groups that you are aware of and are seeking to address or mitigate through this proposal.

3.1 Does the proposal have any potentially adverse impacts on people on the basis of their protected or other relevant characteristics?

Consider sub-categories (different kinds of disability, ethnic background etc.) and how people with combined characteristics (e.g. young women) might have particular needs or experience particular kinds of disadvantage.

Where mitigations indicate a follow-on action, include this in the 'Action Plan' Section 4.2 below.

GENERAL COMMENTS (highlight any potential issues that might impact **all or many groups**) Whilst a council tax increase is proposed Teignbridge has an approved council tax support scheme where it is possible to receive 100% reduction in the council tax charge.

PROTECTED CHARACTERISTICS	
Age: Young People	Does your analysis indicate a disproportionate impact? Yes 🗆 No 🛛
Potential impacts:	Positive via:
	Access to training, work placements and employment.
	Affordable housing options and increased supply of housing
	Sports and other activities targeted at the young
	Contributions to education provision proposed for the wider Teignbridge
	area

Rural	Does your analysis indicate a disproportionate impact? Yes 🗆 No 🛛
Potential impacts:	Positive via:
	Support for business may benefit the rural economy
	Improved access to services through 24/7 online/automated web interactions without leaving home
	Support for the protection and enhancement of the natural and built characteristics of the environment may support the rural economy
Mitigations:	

3.2 Does the proposal create any benefits for people on the basis of their protected or other relevant characteristics?

Outline any potential benefits of the proposal and how they can be maximised. Identify how the proposal will support our <u>Public Sector Equality Duty</u> to:

- ✓ Eliminate unlawful discrimination for a protected group
- Advance equality of opportunity between people who share a protected characteristic and those who don't
- ✓ Foster good relations between people who share a protected characteristic and those who don't

See points raised in 3.1 above.

Step 4: Impact

4.1 How has the equality impact assessment informed or changed the proposal?

What are the main conclusions of this assessment? Use this section to provide an overview of your findings. This content should be used as a summary in reports, where this full assessment is included as an appendix.

If you have identified any significant negative impacts which cannot be mitigated, provide a justification showing how the proposal is proportionate, necessary and appropriate despite this.

Summary of significant negative impacts and how they can be mitigated or justified:

None identified

Summary of positive impacts / opportunities to promote the Public Sector Equality Duty:

Improving access to services

Helping people of all ages to get/stay healthy

4.2 Action Plan

Use this section to set out any actions you have identified to improve data, mitigate issues, or maximise opportunities etc. If an action is to meet the needs of a particular protected group please specify this.

Improvement / action required	Responsible Officer	Timescale

4.3 How will the impact of your proposal and actions be measured?

How will you know if have been successful? Once the activity has been implemented this equality impact assessment should be periodically reviewed to make sure your changes have been effective and your approach is still appropriate. Include the timescale for review in your action plan above.

Consultation feedback is provided to members at the Council budget meeting. Council performance is monitored and reported on a regular basis to Overview & Scrutiny Committee 1 and 2 and this includes Council Plan achievements.

Budget changes are monitored via quarterly updates to Executive by the Chief Finance Officer

Step 5: Review & Sign-Off

ElAs should only be marked as reviewed when they provide sufficient information for decision-makers on the equalities impact of the proposal. Please seek review and feedback from management before requesting it to be signed off. All working drafts of ElAs and final signed-off ElAs should be saved in G:\GLOBAL\ElA Once signed-off please add the details to the 'ElA Register' of all council ElAs saved in the same directory.
