

## **Equality Impact Assessment**

Assessment Of: South East Devon Wildlife - Joint Habitats Site Mitigation Strategy - 2025 to 2030		
oxtimes Policy $oxtimes$ Strategy $oxtimes$ Function $oxtimes$ Service	□ New	
☐ Other:	oxtimes Already exists / review $oxtimes$ Changing	
Directorate: Strategy and Partnerships	Assessment carried out by: Alex Lessware	
Service Area: Spatial Planning	Job Role: Delivery & Economy Manager	
Date of Sign Off by Director: 8 May 2025	Neil Blaney	
·	·	

### Step 1: What do we want to do?

This assessment should be started at the beginning of the process by someone with a good knowledge of the proposal and service area, and sufficient influence over the proposal. It is good practice to take a team approach to completing the equality impact assessment. Please contact the Policy Officer early for advice.

#### 1.1 What are the aims and objectives/purpose of this proposal?

Briefly explain the purpose of the proposal and why it is needed. Describe who it is aimed at and the intended aims / outcomes. Where known also summarise the key actions you plan to undertake. Please use <u>plain English</u>, avoiding jargon and acronyms. Equality Impact Assessments are viewed by a wide range of people including decision-makers and the wider public.

Three sites in south east Devon - the Exe Estuary, the East Devon Pebblebed Heaths and Dawlish Warren - fall in the highest tier of protected wildlife sites in the UK. In the absence of mitigation, Habitats Regulations Assessment work has shown that unacceptable adverse impacts would arise at these sites on account of recreational pressure and this would be reason to not allow the development to go ahead. East Devon District Council, Teignbridge District Council and Exeter City Council have been working in partnership since the early 2010's to define and deliver mitigation measures.

In 2014 a mitigation strategy was approved by the three local authority partners and this has led to an extensive range of measures being implemented that have successfully ensured new development can go ahead. We have now reached a point where we need a new mitigation strategy. Endorsement is being sought from the three constituent local authorities (Teignbridge, East Devon and Exeter) for the new strategy in order to ensure that effective and coordinated mitigation can be implemented in the period from 2025 to 2030.

## 1.2 Who will the proposal have the potential to affect?

## 1.3 Will the proposal have an equality impact?

Could the proposal affect access levels of representation or participation in a service, or does it have the potential to change e.g. quality of life: health, education, or standard of living etc.?

If 'No' explain why you are sure there will be no equality impact, then skip steps 2-4 and request review by your manager.

If 'Yes' complete the rest of this assessment.

⊠ No	[please select]

The mitigation requirements will be paid for by most new developments (in particular new homes) built within 10 KM of the protected habitats. The measures set out in the mitigation strategy 2025-2030 include a broad range of approaches to reducing the impacts of recreational pressure on the protected habitats (see Table 5 of Strategy).

These measures include, for example, new staff, new vehicles, improved website, monitoring & surveys, leaflets and codes of conduct, engagement and interpretation boards, and new SANGS (Countryside parks).

These are unlikely to have equality impacts, and in most cases will be subject to their own EqIA when significant new projects or measures are developed and approved.

## Step 2: What information do we have?

#### 2.1 What data or evidence is there which tells us who is, or could be affected?

Please use this section to demonstrate an understanding of who could be affected by the proposal. Include general population data where appropriate, and information about people who will be affected with particular reference to protected and other relevant characteristics (listed in 2.2).

Use one row for each evidence source and say which characteristic(s) it relates to. You can include a mix of qualitative and quantitative data - from national research, local data or previous consultations and engagement activities.

Outline whether there are any over or under representation of equality groups within your service - don't forget to benchmark to local population where appropriate.

For workforce / management of change proposals you will need to look at the diversity of the affected team(s) using available evidence such as the employee profile data. Identify any under/over-representation for age; disability; gender reassignment; marriage and civil partnership; pregnancy and maternity; race; religion or belief; sex; and sexual orientation. Please see: <a href="Equality Act 2010">Equality Act 2010</a> (legislation.gov.uk).

Data / Evidence Source	Summary of what this tells us
[Include a reference where known]	
Additional comments:	

## 2.2 Do you currently monitor relevant activity by the following protected characteristics?

□ Age	☐ Disability	☐ Gender Reassignment
		□ Oerider Kedssigninerii
☐ Marriage and Civil Partnership	□ Pregnancy/Maternity	□ Race
☐ Religion or Belief	□ Sex	☐ Sexual Orientation

## 2.3 Are there any gaps in the evidence base?

Where there are gaps in the evidence, or you don't have enough information about some equality groups, include an equality action to find out in section 4.2 below. This doesn't mean that you can't complete the

assessment without the information, but you need to follow up the action and if necessary, review the assessment later. If you are unable to fill in the gaps please state this clearly with a justification.

For workforce related proposals all relevant information on characteristics may need to be sought from HR (e.g. pregnancy/maternity). For smaller teams diversity data may be redacted. A high proportion of not known/not disclosed may require action to address and identify the information needed.

#### 2.4 How have you involved communities and groups that could be affected?

You will nearly always need to involve and consult with internal and external stakeholders during your assessment. The extent of the engagement will depend on the nature of the proposal or change. This should usually include individuals and groups representing different relevant protected characteristics. Please include details of any completed engagement and consultation and how representative this has been of Teignbridge's diverse communities.

Include the main findings of any engagement and consultation in Section 2.1 above.

If you are managing a workforce change process or restructure please refer to HR for advice on how to consult and engage with employees. Relevant stakeholders for engagement about workforce changes may include e.g. staff-led groups, trades unions as well as affected staff.

#### 2.5 How will engagement with stakeholders continue?

Explain how you will continue to engage with stakeholders throughout the course of planning and delivery. Please describe where more engagement and consultation is required and set out how you intend to undertake it. Include any targeted work to seek the views of under-represented groups. If you do not intend to undertake it, please set out your justification. You can ask the Consultation Officer for help in targeting particular groups.

## Step 3: Who might the proposal impact?

Analysis of impacts must be rigorous. Please demonstrate your analysis of any impacts of the proposal in this section, referring to evidence you have gathered above and the characteristics protected by the Equality Act 2010. Also include details of existing issues for particular groups that you are aware of and are seeking to address or mitigate through this proposal.

# 3.1 Does the proposal have any potentially adverse impacts on people on the basis of their protected or other relevant characteristics?

Consider sub-categories (different kinds of disability, ethnic background etc.) and how people with combined characteristics (e.g. young women) might have particular needs or experience particular kinds of disadvantage.

Where mitigations indicate a follow-on action, include this in the 'Action Plan' Section 4.2 below.

## 3.2 Does the proposal create any benefits for people on the basis of their protected or other relevant characteristics?

Outline any potential benefits of the proposal and how they can be maximised. Identify how the proposal will support our <u>Public Sector Equality Duty</u> to:

- ✓ Eliminate unlawful discrimination for a protected group
- ✓ Advance equality of opportunity between people who share a protected characteristic and those
  who don't
- ✓ Foster good relations between people who share a protected characteristic and those who don't.

### Step 4: Impact

## 4.1 How has the equality impact assessment informed or changed the proposal?

What are the main conclusions of this assessment? Use this section to provide an overview of your findings. This content should be used as a summary in reports, where this full assessment is included as an appendix.

If you have identified any significant negative impacts which cannot be mitigated, provide a justification showing how the proposal is proportionate, necessary and appropriate despite this.

Summary of significant negative impacts and how they can be mitigated or justified:		
Summary of positive impacts / opportunities to promote the Public Sector Equality Duty:		

#### 4.2 Action Plan

Use this section to set out any actions you have identified to improve data, mitigate issues, or maximise opportunities etc. If an action is to meet the needs of a particular protected group please specify this.

Improvement / action required	Responsible Officer	Timescale

### 4.3 How will the impact of your proposal and actions be measured?

How will you know if have been successful? Once the activity has been implemented this equality impact assessment should be periodically reviewed to make sure your changes have been effective and your approach is still appropriate. Include the timescale for review in your action plan above.

## 4.4 Is there an opportunity to promote positive attitudes and good relations between different groups and communities?

## Step 5: Review & Sign-Off

ElAs should only be marked as reviewed when they provide sufficient information for decision-makers on the equalities impact of the proposal. Please seek review and feedback from management before requesting it to be signed off. All working drafts of ElAs and final signed-off ElAs should be saved in G:\GLOBAL\EIA Once signed-off please add the details to the 'EIA Register' of all council ElAs saved in the same directory.
