6d.	23/02157/FUL – Land off Idestone Lane, Ide The agent has written to the Local Planning Authority to advise the following: <i>The committee report identifies the site as being classified as Grade 2 agricultural land according to Natural England, which means it is included under 'best and most versatile'. The application site is not completely 'versatile' however, because its usage is limited to grazing/silage owing to the presence of the Scheduled Monument - it therefore cannot be cultivated / used for arable purposes without further scheduled monument consent.</i>
